FUJILAM TEST PRINCIPLE

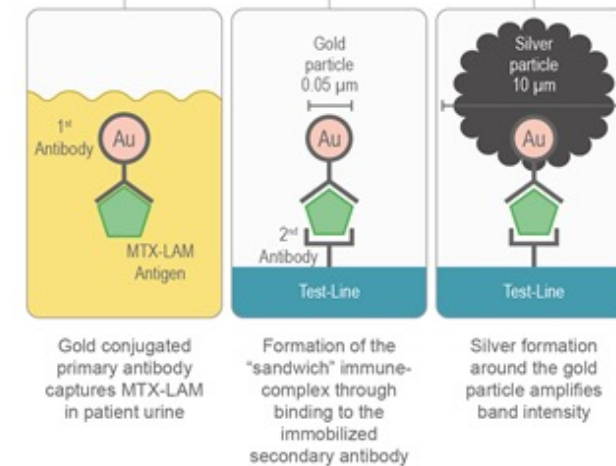

TB Test Procedure

60 minutes from sample collection to result

TB Test Principle

COMPARATIVE PERFORMANCE OF FUJILAM AND ALERELAM IN PLHIV META ANALYSIS OF 1595 PATIENT SAMPLES FROM 5 COHORTS SSA & VIETNAM

All HIV+					
	N	Sn	[95% CI]	Sp	[95% CI]
FujiLAM	1595	70.7	[59.0 – 80.8]	90.9	[87.2 – 93.7]
AlereLAM	1595	34.9	[19.5 – 50.9]	95.3	[92.2 – 97.7]
Diff Sn and Diff Sp		35.8		-4.4	

Stratified by CD4 cell count						
	CD4 group	N	Sn	[95% CI]	Sp	[95% CI]
FujiLAM	CD4 grp 0–100	677	87.1	[79.3 – 93.6]	80.5	[69.8 – 89.7]
	CD4 grp 100–200	319	62.7	[52.4 – 71.9]	95.0	[85.6 – 99.8]
	CD4 grp >200	581	43.9	[34.3 – 53.9]	97.0	[94.9 – 98.5]
AlereLAM	CD4 grp 0–100	677	56.0	[43.9 – 64.9]	93.6	[89.6 – 97.0]
	CD4 grp 100–200	319	25.3	[15.8 – 34.9]	96.7	[89.4 – 99.9]
	CD4 grp >200	581	10.9	[5.2 – 18.4]	97.6	[93.0 – 99.7]

CLINICAL MEDICINE

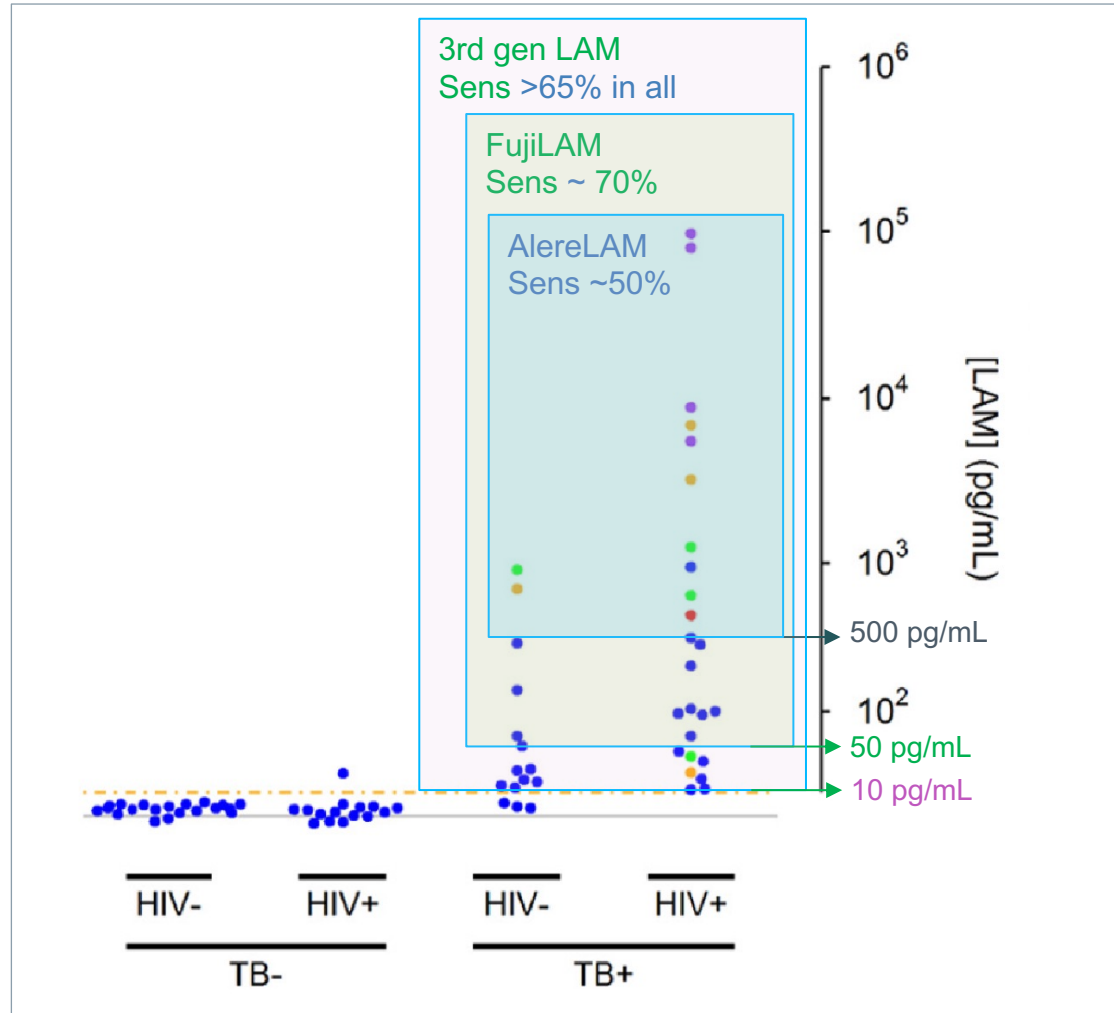

The Journal of Clinical Investigation

Diagnostic accuracy of 3 urine lipoarabinomannan tuberculosis assays in HIV-negative outpatients

Urine LAM tests	n	TP	FP	FN	TN	Sensitivity (95% CI)	Specificity (95% CI)
AlereLAM	372	12	20	99	241	10.8% (6.3 to 18.0)	92.3% (88.5 to 95.0)
FujiLAM	372	59	3	52	258	53.2% (43.9 to 62.2)	98.9% (96.7 to 99.6)
EcLAM	372	74	5	37	256	66.7% (57.5 to 74.7)	98.1% (95.6 to 99.2)

>15 FujiLAM studies ongoing/planned
FIND expects results from a large evaluation in Q1 2022
WHO policy review is likely in 2022

CHALLENGE 1 - LAM IS PROBABLY FOUND IN ALL TB PATIENTS, BUT LEVELS ARE LOW

CHALLENGE 2, URINE LAM IS PROBABLY MANY THINGS

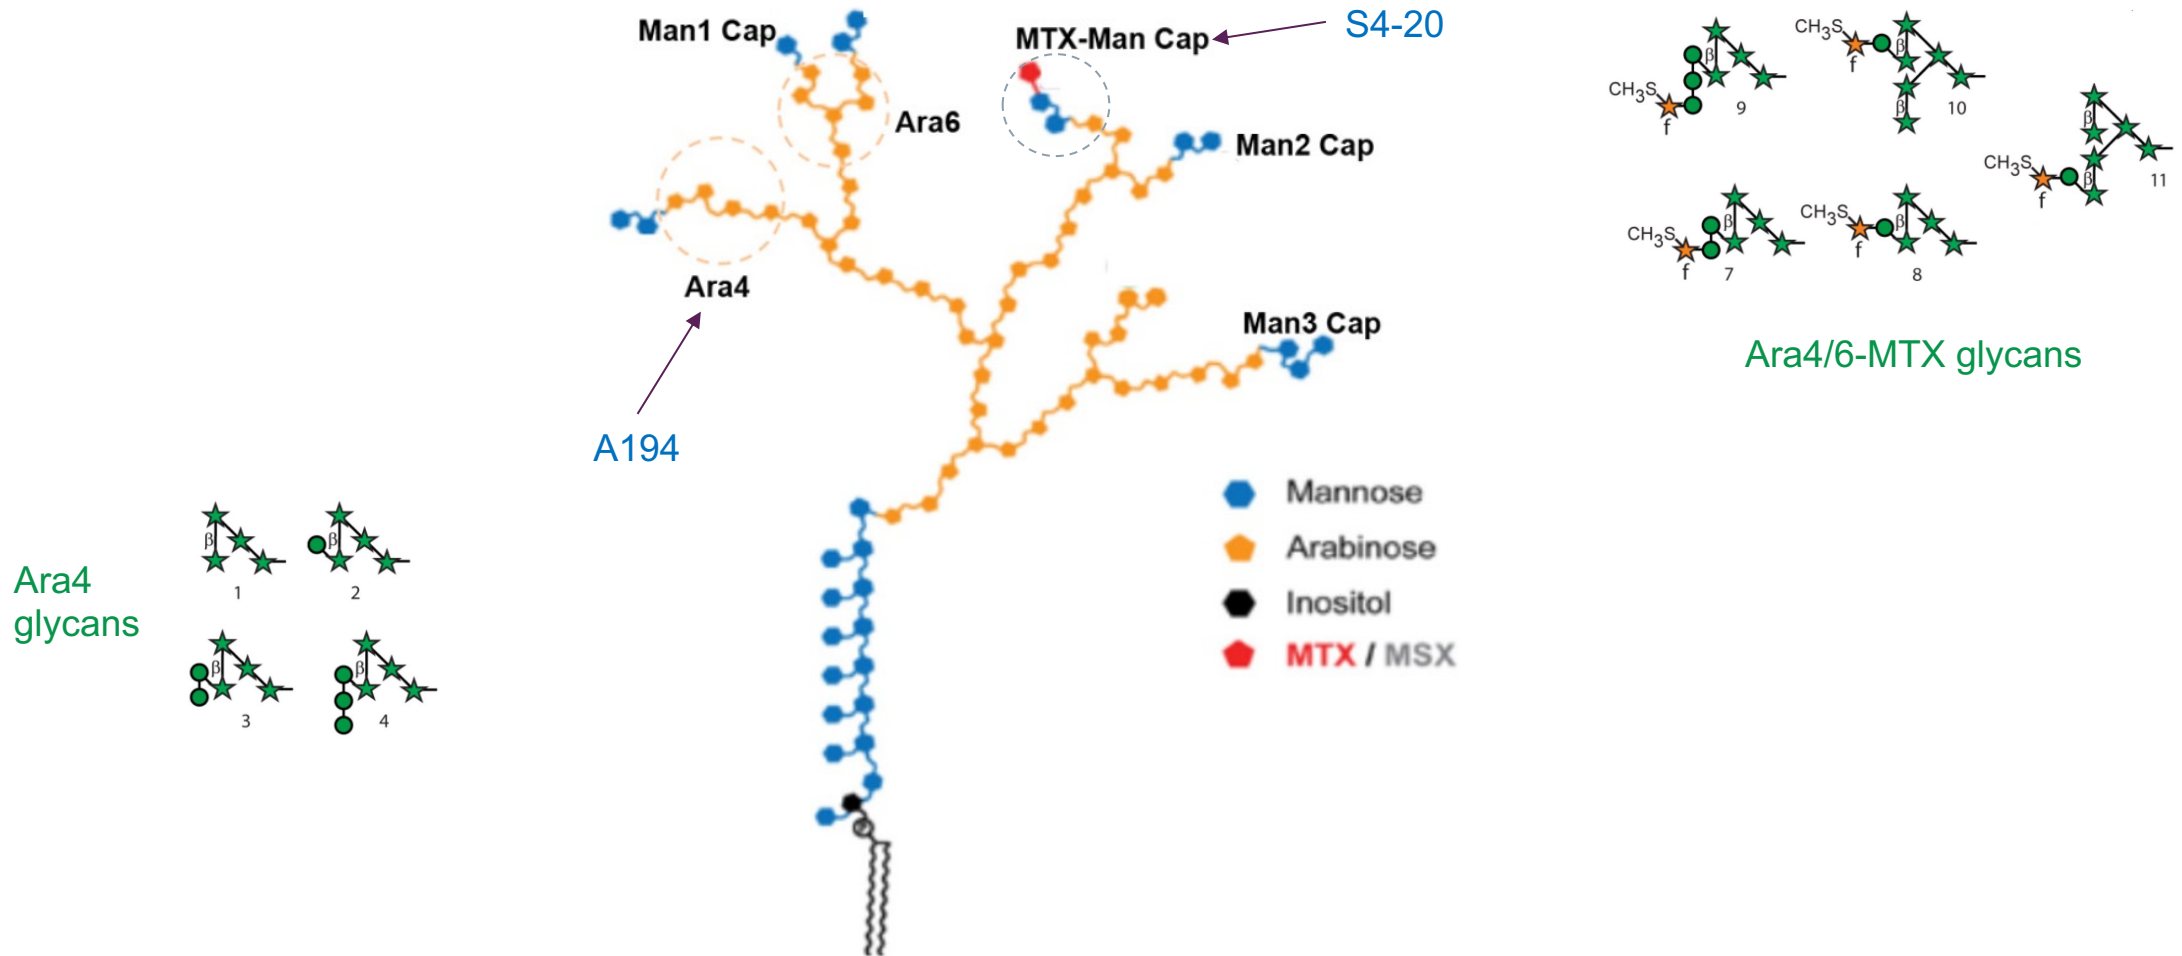

LAM from mycobacterial culture

LAM in urine

CHALLENGE 3 - LAM IS SMALL, AND GLYCANS ARE EVEN SMALLER

A SENSE OF PROPORTIONS

LAM
(17 kDa)

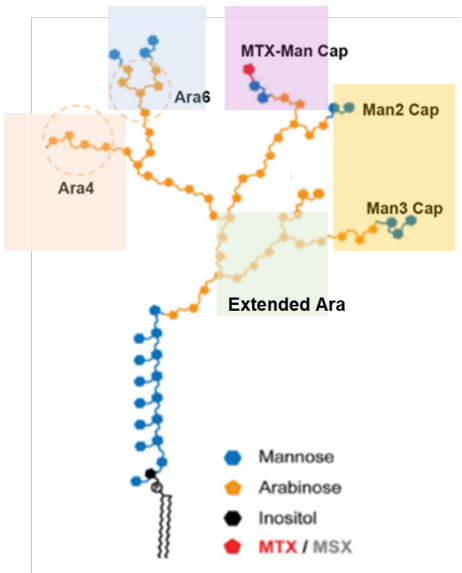

PATHWAYS TO 3RD GENERATION LAM TESTS

3rd Generation LAM assay
Ultra sensitive (<10 pg/mL) to detect LAM in all TB patients

Improved reagents
(antibodies, antigens)

Pre-analytical
Sample Preparation

Innovative
Assay Design

TAKE HOME MESSAGES

- Despite modest sensitivity, Alere LAM assay has a unique role in the diagnostic landscape providing rapid and accessible diagnosis to the sickest patients with the worst prognosis
- FujiLAM is a 2nd generation LAM assay in development with improved performance
- 3rd generation LAM tests with higher sensitivity are pursued by multiple manufacturers, these tests require concentration or readers to deliver urine-based TB detection for all irrespective of HIV status
